CLP05 Indicator:

Percentage of all 5 year old children (from 5 years of age and under 6 years of age) born with cleft palate involvement, born in the designated year, and who have had their hearing assessed during that year.

Cohort summary	Data source	CRANE Database.
	Countries	England and Wales.
	Coverage period	All children registered in the CRANE Database with a date of birth within the reporting year (refreshed every calendar year) ¹ .
	Exclusions	Scotland and Northern Ireland registrations.
	Numerator	Number of children born with cleft palate involvement, born in the designated year, who had a hearing assessment between 5 years of age and before 6 years of age. NOT from CRANE Provided by the team teams directly to Methods/Dashboard
	Denominator	Total number of (5 year old) children, born in the designated year, with a cleft palate (including CP, UCLP and BCLP).
	Inclusions [Denominator]	(a) All children who are alive at five years of age, regardless of consent status. (b) All children with a cleft palate, including CP, UCLP and BCLP. (c) All children without submucous cleft palates.
	CRANE data items (Field name in data dictionary) ² [Denominator]	(a) Date of birth (dob) – to specify the time period. (b) Date of death (dod) – to ensure all children included were alive at five years of age. (b) Administrative Unit Name (unit_id) – to report appropriately (and exclude Scotland and Northern Ireland registrations). (c) Cleft type (cleft_type or cleft_type_without_lahsal) with response values of '2=CP' or '3=UCLP' or '4=BCLP'. (e) Submucous cleft palate (submucous) with response values of '1=No'.

¹ For example, this is 2013 births for the 2020/21 SSQ Dashboards.
